Abstract

INNOVOE is a registered software/IT company formed in 2014 with a vision to making momentous contribution for the nation by developing the field of Information Technology Industry. The main objectives of the firm are to take active participation in projects and try to influence the IT industry in a way which suits economy, Trends, socio-cultural traits and way of life in the country. We always adapt our working methods to the client's specific needs.

We provide software solutions and suggestions for clients both in our country and abroad. We implement various kinds of solutions including customized cloud application, Customized desktop application, Enterprise Resource Planning (ERP), online security, static/dynamic/interactive websites, Point Of Sale (POS), School-hospital management system, Task Distribution System etc. Through our products and support, our dream is to digitalize our nation and businesses in every layer.

Implementing our client's imagination into a user-friendly interface is what we're good at. 'User-Friendliness' is our primary motto and the main USP of business. We always look for 100% customer satisfaction and respect deadlines.

As we are keen to bring new things for our beloved country, we are coming up with modern and innovative applications more often.

Core Values

Mission

Boost the competitiveness and sustainability of organizations through innovative software solutions for excellence and enterprise compliance.

Vision

Our vision is to become a world-class software developer and technology provider and to provide clients with innovated technical and business solutions by utilizing industry standards and technology.

Efficiency

We believe that efficiency is something that defines the success or failure of any action. We relentlessly strive to gain more efficiency in every sphere of our endeavors.

Integrity

We strongly believe that honesty and trust are essential for long-term business sustainability. We never compromise with our integrity and always try our best to match customer expectations.

Excellence

We ensure excellence by achieving organizational, professional, and personal improvement. We assess and evaluate current performance and identify opportunities for improvement; and try to close the gap between current and desired performance. As committed pursuers of excellence we always seek to clearly articulate our vision, honestly appraise our current performance and develop a capacity for change.

Software Services

- Dental Practice Software.
- Trade Management System and POS (Point of Sale)
- Customized desktop application.
- Enterprise Resource Planning (ERP).
- Static/Dynamic/Interactive websites.
- Customer Relation Management system (CRM).
- School/College Management System.
- Hospital management system.
- Task management/distribution System.
- Customized cloud application

Technology and Skill Set

The INNOVOE development team consists of industry experts delivering a full spectrum of digital solutions. Our deep expertise supports every stage of digital transformation and system innovation.

· Responsive Web Design & Development

We create dynamic, responsive websites optimized for all devices. Using advanced frameworks, we ensure intuitive, visually appealing, and high-performance designs for an enhanced user experience.

· Mobile Application Development (Android & iOS)

Our team develops high-quality mobile applications for Android and iOS. We focus on user-centric design, security, and functionality to ensure outstanding user experiences and business success.

· Digital Marketing & Strategic Growth

We offer SEO, social media marketing, content strategy, and blog management. Using data-driven strategies, we enhance search rankings, boost social presence, and drive targeted traffic.

· Cloud Architecture & Server Management
We configure and manage cloud-based and physical servers with security, scalability, and resilience. Our expertise spans AWS, Azure, and best practices in security and disaster recovery.

· Data Privacy, Security, and Compliance
Our experts implement multi-layered security protocols, data encryption, and risk assessments. We ensure compliance and provide a secure environment for user and business data.

· Hosting, Domain Management & Database Solutions
We offer hosting and domain management with high availability and performance. Our database expertise covers SQL and MySQL for structured and unstructured data management.

· Geographic Information System (GIS) Development
We create GIS applications that integrate spatial data for analysis and visualization. Our solutions support industries like urban planning, logistics, and environmental management.

· Artificial Intelligence (AI) & Machine Learning (ML)
Our AI and ML capabilities drive innovation with predictive analytics, recommendation systems, natural language processing, and automation. We help clients leverage data to gain insights, improve operational efficiency, and deliver personalized user experiences, integrating intelligent algorithms into applications and workflows.

With a commitment to quality, security, and innovation, INNOVOE delivers tailored digital solutions. Our diverse expertise ensures seamless project execution, from concept to deployment.

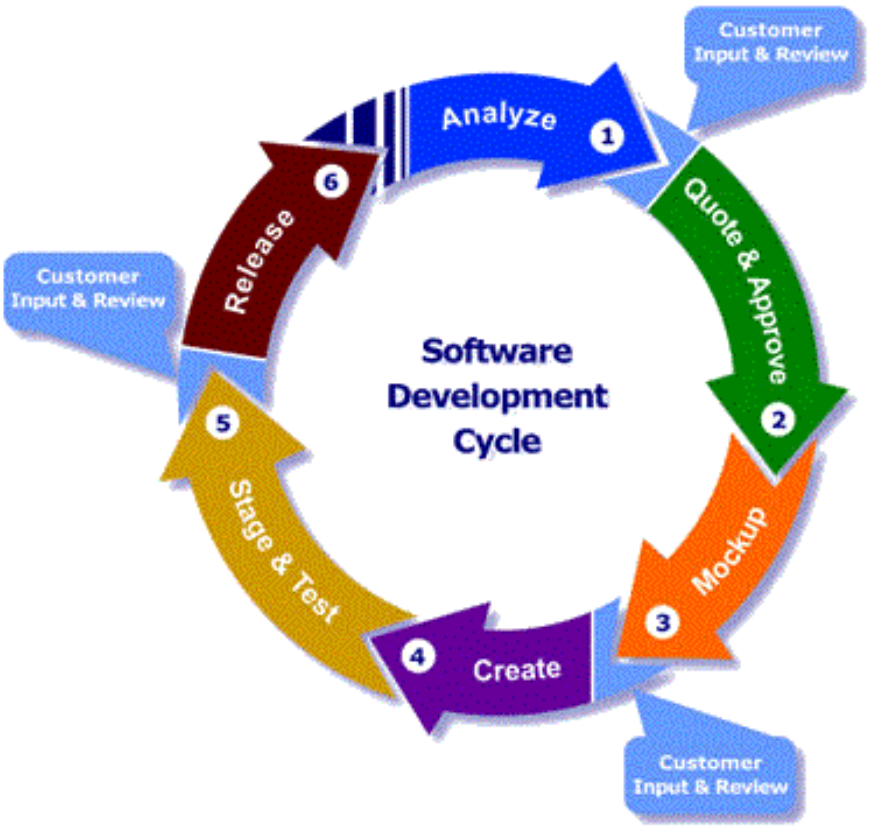
Languages and Frameworks

pHP, Codeigniter, Bootstrap, jQuery, React, Tailwind, Node.Js, Electron, Python, Django, PyTorch, Langchain, Dart, Flutter

Development Process

The development process of our firm follows these conventional steps to ensure streamlined delivery.

- Analyze, Assess the methods and workload
- Quote and Approve
- Mockup (followed by continuous customer input and review)
- Create the core
- Stage and Test (also followed by continuous customer input and review)
- Release/Delivery



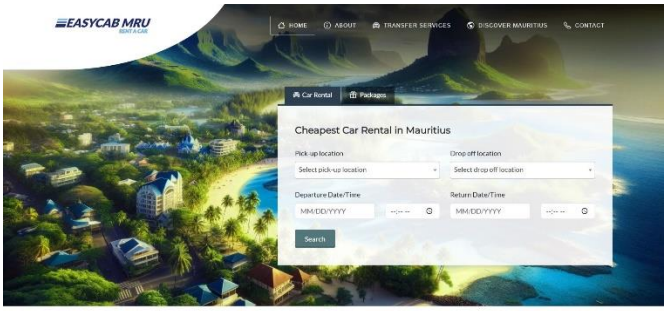
Our Successes

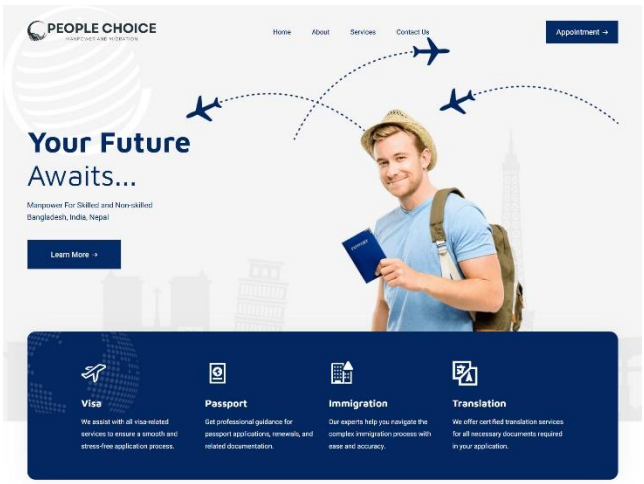
As a custom software development firm, INNOVOE has amassed a remarkable resume of projects. It's the custom nature of our development projects that has enabled us to acquire vast experience in many diverse areas of software development. Our experience, in conjunction with our quality personnel, enables INNOVOE to be dynamic enough to tackle any challenge if the requirement is logical.

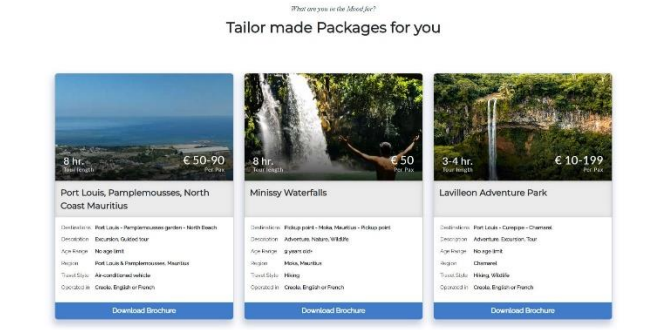
INNOVOE has a proud history of utilizing experience to provide our clients with the best services possible. This difficult task is accomplished by applying experienced personnel to every project. This firm was founded on the principle of gathering an elite group of software engineers and professionals, and leveraging their collective abilities. Naturally, each of these 'producers' brings their own particular specialization and experience to the table. Once they join the INNOVOE team, we cross-train our consultants to diversify and increase their overall skills. The result for our clients is a group of individuals that can genuinely contribute and have a positive impact on development projects.

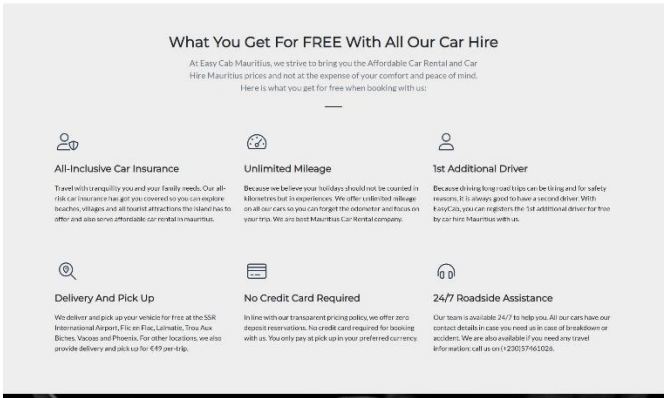
Here some of our projects are displayed in brief to introduce the interested persons with the versatility of our software development:

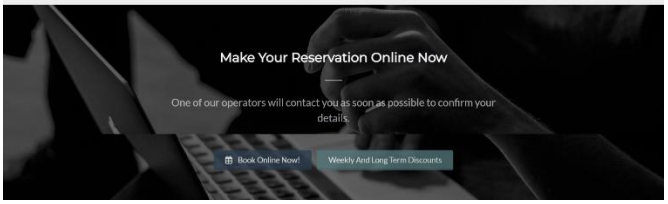
Some of our recent work snapshots :

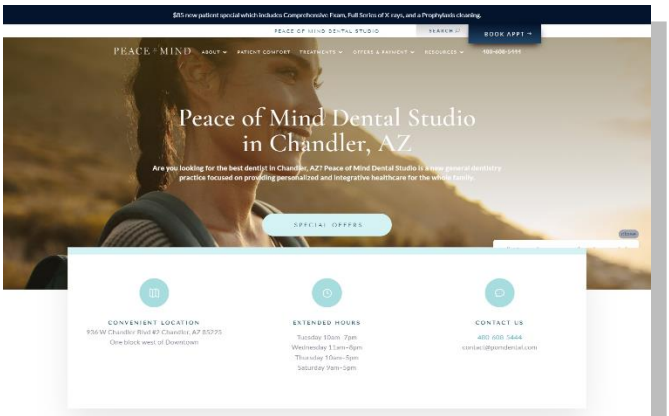










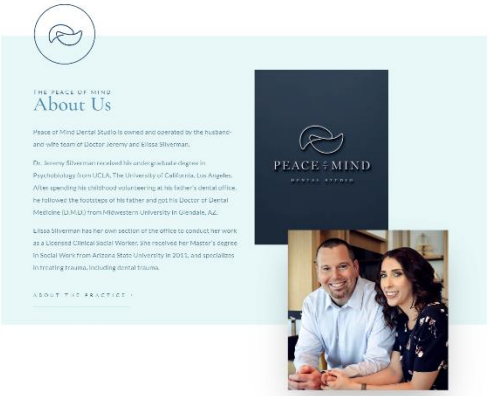


WORLDWIDE EXPRESS DELIVERY!!

Global supply within shortest time!
In 5-7 working days your package arrived worldwide. Hand to hand delivery.

Realtime shipment tracking
You can realtime track your package location with a simple click. Just don't forget to put in your tracker number!

Best Rate in Asia, Middle East and Africa
Best market rate 30-70% cheaper than SwissPost, DHL, FedEx,UPS etc.



OUR SPECIAL SERVICES

Our warehousing services are known nationwide to be one of the most reliable, safe and affordable, because we take pride in delivering the best of warehousing services, at the most reasonable prices.

Packaging And Storage
Package and store your things effectively and securely to make sure them in storage.

Cargo
Delivery of any freight from a place to another place quickly to save your cost and your time.

Worldwide Transport
Specialises in international freight forwarding of merchandise and associated general logistic services.

Warehousing
Package and store your things effectively and securely to make sure them in storage.

Door to Door Delivery
Our expertise in transport management and planning allows us to design a solution.

Ground Transport
Ground transportation options for all visitors, no matter your needs, schedule or destination.

Our Philosophy

We understand that visiting a dentist isn't everyone's favorite thing to do- it can even cause feelings of extreme anxiety and panic.

With that in mind, our doctors have spent their entire professional lives working to provide their patients with excellent, empathetic oral care, and individualized treatments for any dental-induced distress. Our dentists in Chandler, proudly offer a variety of anxiety and stress-reducing tools so that no patient has to be afraid of taking care of their smile.

Our goal is to help our Chandler patients to permanently reduce symptoms of anxiety, overcome stress and lead a happier life with excellent dental care. Learn more about us here.

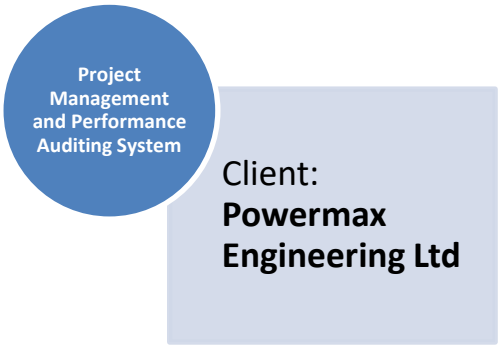
Remarkable Softwares We Developed:

Project Management and Performance Auditing

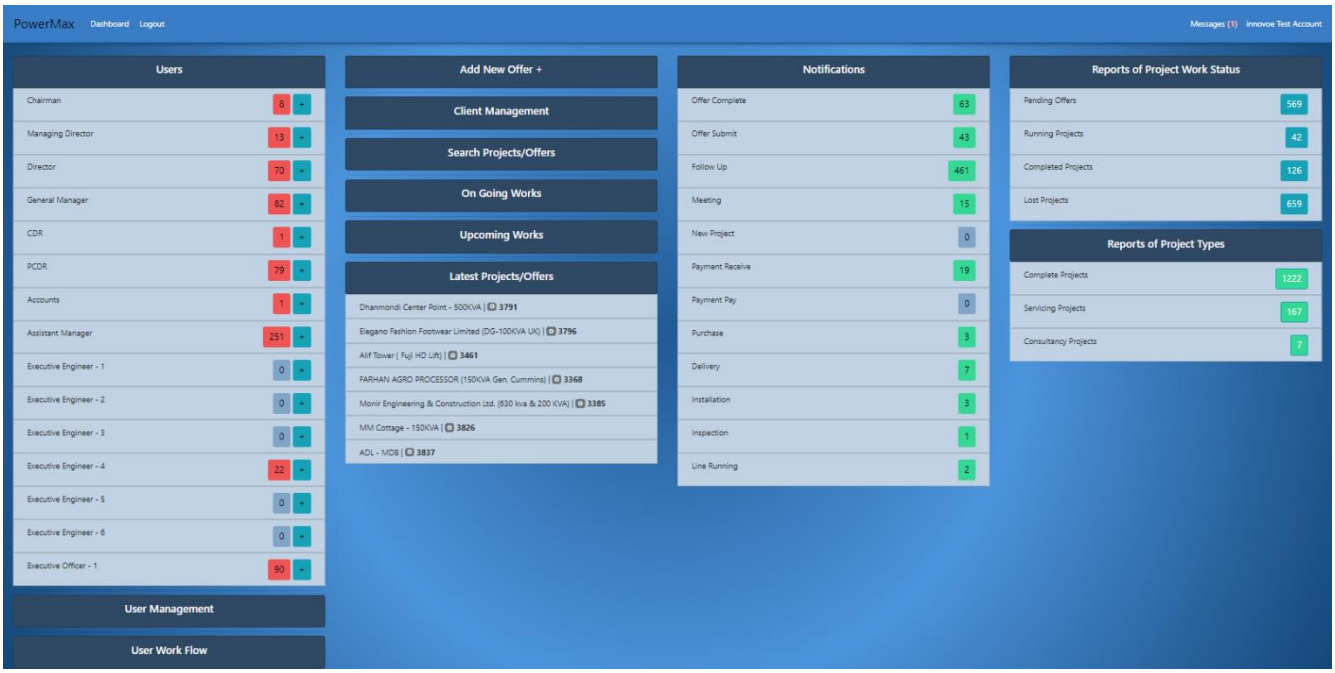


Detail: This is Work-Plan Management software which helps with managing day to day workflows with hierarchy privilege in projects run by Powermax Engineering. It also leave marks for who's done what and which certain task hasn't been done yet by an employee. Every project shows its entire history and performance review for each employee. Design was done as per client demand.

Project Status: Project is completed successfully and being run to handle numerous project managements by the client company.

At a Glance: Some pictures are given here to get a peek at only few of the features we've done here. If someone wishes to know the overall of this project, knock us for a guided tour.

The Dashboard:



User Panel:

Red Button for how many tasks is left for that employee; Green button for assigning a new one.

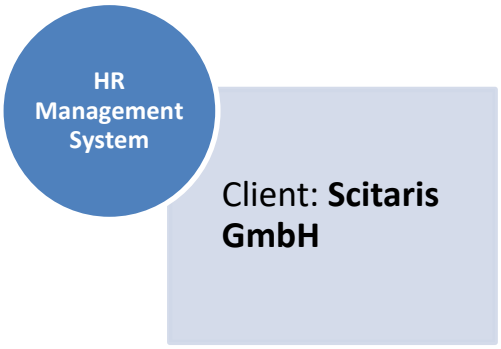
HR Management System



Detail:

A fully customized HR management system designed to meet the specific needs of Scitaris GmbH. This system offers a comprehensive solution for managing employee records, payroll, leave management, performance reviews, and recruitment processes, simplifying administrative tasks and improving efficiency. It is built to scale with the company's growth and provides real-time data access to managers and HR teams.

The system serves as a central hub for all employee-related data, allowing HR professionals to make data-driven decisions with ease. With its intuitive user interface, it ensures a seamless user experience for both administrators and employees. Performance review automation, detailed analytics, and reporting modules allow the management to monitor employee progress and align it with company objectives.

Key Features:

- **Employee Information Management:** Secure and scalable employee database with role-based access control, ensuring data confidentiality and integrity.

- **Payroll Processing & Leave Management:** Automates payroll calculations, tax deductions, and leave approvals, minimizing human errors and saving time.

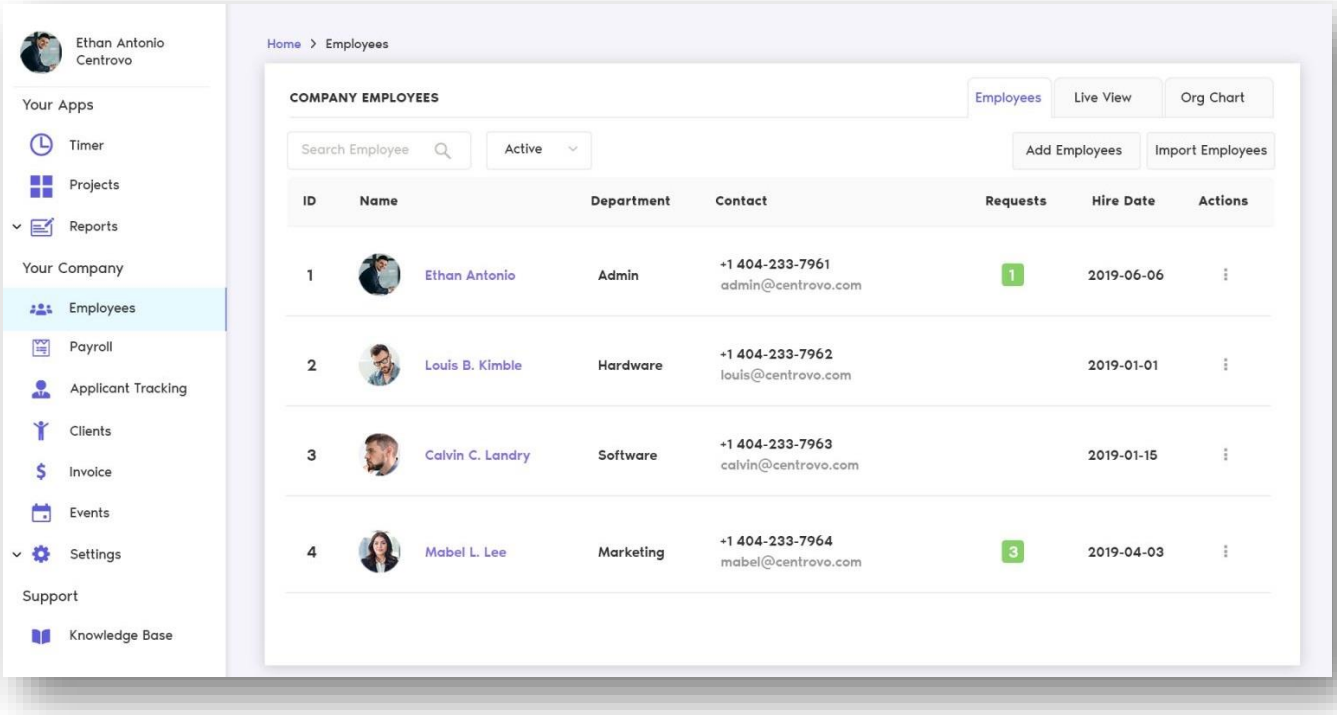
- **Performance Review Module**: Tracks and evaluates employee performance based on predefined criteria, generating detailed reports to support performance-based decision-making.

– **Recruitment Tracking System:** Covers the complete hiring pipeline, from job postings to candidate onboarding, with automated notifications and status tracking.

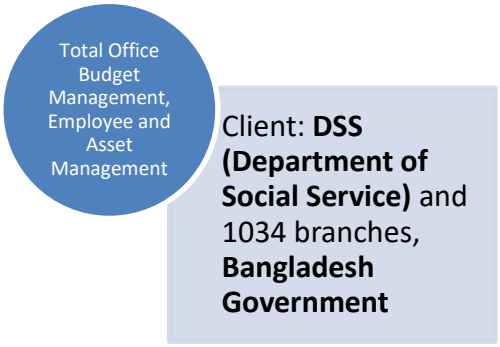
– **Analytics Dashboard:** Offers visual insights into workforce data, helping managers identify trends and make informed decisions.

Project Status:

Successfully deployed and currently used by Scitaris GmbH to manage their entire HR operations. Future modules for employee training and benefits management are planned, ensuring the system remains adaptable to evolving business needs.



Financial Management System, Department of Social Service



Detail: In brief, it's a larger scale application with lots of features for the finance department that has the modules to manage budgetary demands and allotments of the 1034 social service offices of the govt. across all over Bangladesh. It also includes **Information and Asset Management**, **Employee Transfer Management and Payroll**, **Document Uploading and numerous kinds of reports**.

Project Status: Head office of DSS (Dept. of Social Service) Bangladesh has an admin account and 1034 branches each has a field office account for total managements and there are also same amount of accounts for report viewing in a hierarchical basis. They are still using this product on our firm's server and we're soon launching a local server in the head office of DSS.

At a Glance: Some pictures are given here to get a peek at only few of the modules we've done here. If someone wishes to know the overall of this project, it will require a guided tour.

Custom ERP

Detail:
A custom-built ERP solution specifically developed for Point Blank Paintball to streamline its operations. This comprehensive system integrates inventory management, customer bookings, sales, and financial records, enabling real-time data access and management in one platform.

The ERP provides a seamless experience for both staff and customers. Real-time inventory tracking ensures that essential equipment is always available, while the booking system simplifies reservations and customer engagement. Automated billing and financial reporting help reduce manual errors and offer detailed insights into business performance.

Key Features:

- **Inventory Management**: Real-time tracking of equipment usage and stock levels, ensuring accurate inventory control.

- **Customer Booking System:** Allows for quick and hassle-free reservations with automated booking confirmations and reminders.

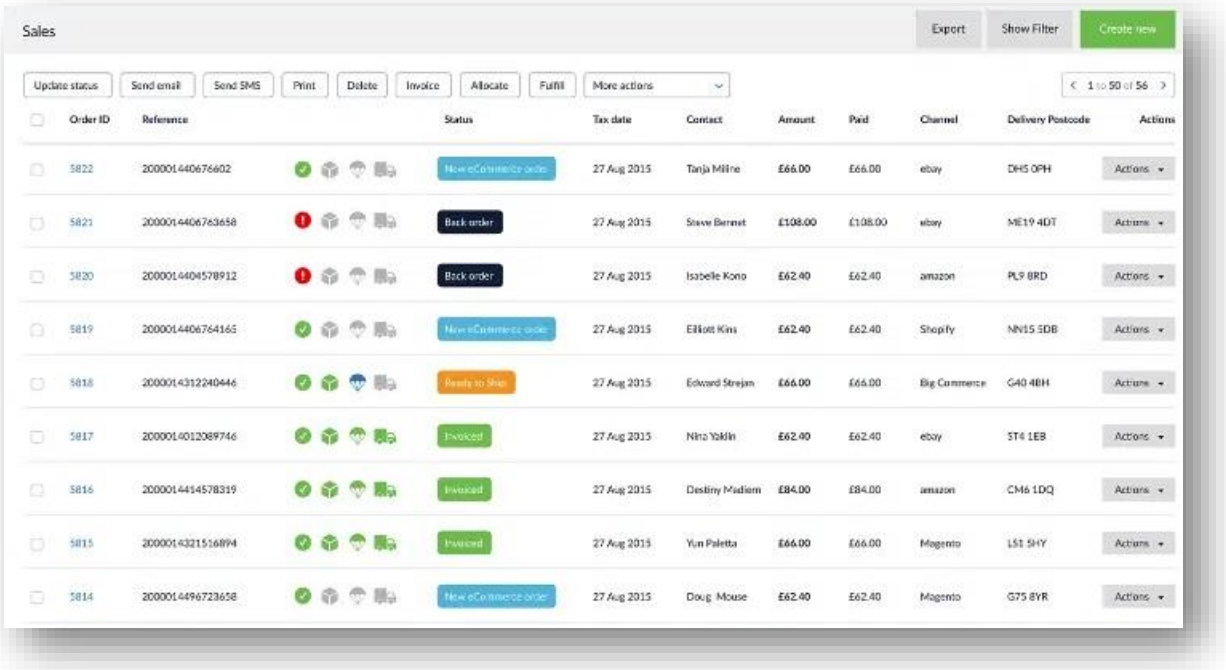
- **Sales & Billing Management:** Generates invoices, manages payments, and maintains a detailed sales history for auditing purposes.

- **Financial Reporting Module:** Provides comprehensive financial reports to help in revenue tracking and expense management.

- **User-Friendly Dashboard:** Centralized control panel for managing all business operations, with customizable views for different user roles.

Project Status:

Fully implemented and actively used by the client to manage day-to-day operations. The ERP has significantly improved customer satisfaction and operational efficiency.



Online Radio

Detail:

A custom-built ERP solution specifically developed for Point Blank Paintball to streamline its operations. This comprehensive system integrates inventory management, customer bookings, sales, and financial records, enabling real-time data access and management in one platform.

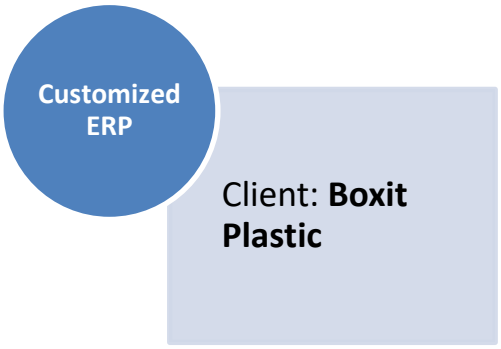
Key Features:

- **Live Audio Streaming**: High-quality, low-latency streaming ensures a smooth listening experience.
- **Song Request System**: Listeners can request songs in real-time, creating an interactive and engaging platform.
- **DJ Management**: Enables DJs to manage their schedules, track song requests, and control live sessions.
- **Mobile-Friendly Interface**: Optimized for access on smartphones and tablets, ensuring listeners can tune in on the go.
- **Social Media Integration**: Enhances audience engagement and drives traffic to the platform.

Project Status:

The project is live and successfully engaging a broad listener base. The platform's flexibility and performance have been widely appreciated by users.

ERP System



Detail:

A comprehensive ERP system designed for Boxit Plastic to manage production planning, inventory control, sales, procurement, and financial reporting. This system ensures seamless coordination across different departments, optimizing manufacturing workflows and improving operational efficiency.
. The production planning module helps allocate resources effectively, while the financial reporting module provides real-time insights into business performance, helping managers make informed decisions.

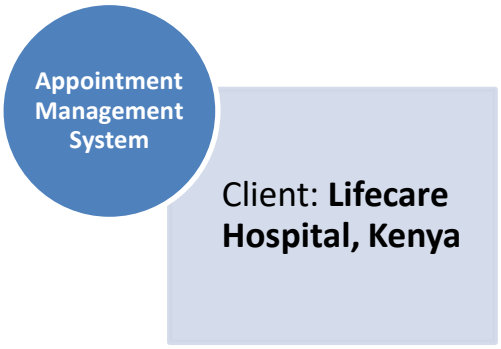
Key Features:

- **Production Planning & Control:** Automates production scheduling and resource allocation to ensure optimal efficiency.
- **Inventory & Procurement Modules:** Tracks raw materials and manages supplier relationships, reducing stockouts and procurement delays.
- **Sales & Customer Relationship Management (CRM):** Centralizes customer data for improved service and relationship management.
- **Financial Reporting:** Offers real-time business insights through customizable financial reports.
- **Customizable Dashboard:** Tailored dashboards for different departments, providing relevant information at a glance.

Project Status:

Successfully deployed and actively used to manage daily operations at Boxit Plastic. The ERP system has significantly improved production efficiency and reduced operational costs.

Appointment Management System



Detail:

A robust appointment management system developed for LifeCare Hospital, Kenya, aimed at simplifying patient appointments and improving the overall patient experience. The system efficiently manages doctor schedules, patient registrations, medical history tracking, and automated reminders.

With automated notifications for upcoming appointments, patients are kept informed and engaged. The reporting module provides insights into appointment trends and resource utilization, helping hospital management make data-driven decisions.

Key Features:

- **Doctor Schedule Management**: Tracks doctor availability and optimizes appointment slots.
- **Patient Registration & Appointment Booking:** Simplifies appointment management with online registration and automated reminders.
- **Medical History Tracking:** Maintains comprehensive patient records for accurate and timely diagnosis.
- **Automated Reminders:** Sends SMS and email notifications to patients about upcoming appointments.
- **Reporting & Analytics:** Provides detailed insights into appointment trends and resource utilization.

Project Status:

The system is live and actively used by LifeCare Hospital staff to manage thousands of patient appointments monthly. Future updates will include telehealth integration, expanding the hospital's digital services.

Training Management System, Department of Social Service

Employee Training Management System

Client: DSS (Department of Social Service), **Bangladesh Government**

Detail: A management system for employee training of DSS where all the employee information and trainings are handled by the training admin. It includes creating trainings, enrolling/excluding employees, training history, and reports section.

Project Status: Head office admin is currently this program to organise employees in the Training Management System. More modules are planned to include later.

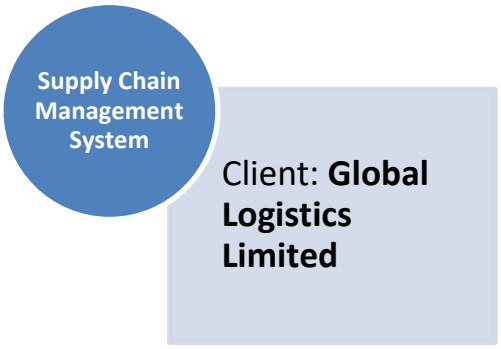
Supply Chain Management System



Detail:

A supply chain management solution designed for Global Logistics Ltd., enabling end-to-end visibility and control over procurement, warehousing, inventory management, and transportation. This system addresses the complexities of modern supply chains, ensuring that every step in the process is optimized for maximum efficiency and cost savings.

The solution provides real-time inventory updates, ensuring accurate stock levels across multiple warehouses and preventing shortages. Procurement automation streamlines vendor management, from request to delivery. Advanced data analytics offer insights into operational performance, allowing businesses to avoid disruptions and maintain a seamless supply chain flow.

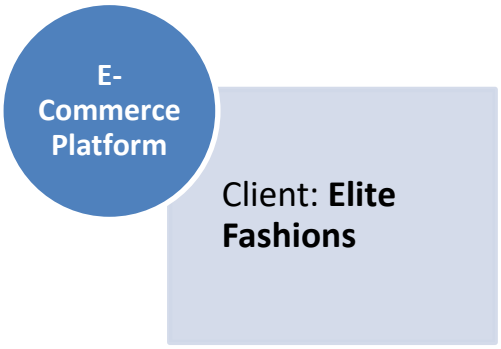
Key Features:

- **Real-Time Inventory Tracking** – Prevents overstock and shortages.
- **Procurement Automation** – Streamlines vendor management.
- **Order Fulfillment Tracking** – Monitors order status from request to delivery.
- **Transportation Management** – Optimizes routing and scheduling.
- Data Analytics & Reporting – Provides operational insights.

Project Status:

Successfully implemented and actively used by Global Logistics to manage its supply chain operations. This system has helped reduce operational costs and significantly improve delivery times.

E-Commerce Platform



Detail:

An innovative e-commerce platform built for Elite Fashions, offering a seamless shopping experience for customers while enabling vendors to manage their inventories and sales efficiently. This platform was designed to handle high traffic and ensure secure transactions across multiple payment gateways.

The platform supports multi-vendor management, allowing vendors to manage product listings, track stock, and monitor sales performance. Personalized product recommendations and integrated marketing tools improve customer engagement and boost sales. With real-time stock synchronization, overselling is prevented, ensuring a smooth customer experience.

Key Features:

- **Product Management & Customization**: Vendors can easily create and manage product listings with custom attributes and variants.
- **Secure Payment Integration**: Supports multiple payment gateways for secure and convenient transactions.
- **Customer Reviews & Feedback:** Builds trust through verified customer feedback.
- **Real-Time Inventory Updates:** Synchronizes stock levels across all sales channels in real-time.
- **Marketing Tools:** Integrated SEO, discounts, and promotional campaign management help increase traffic and sales.

Project Status:

Live and serving thousands of customers daily. Elite Fashions continues to benefit from improved sales efficiency and enhanced customer engagement.

E-Learning Management System

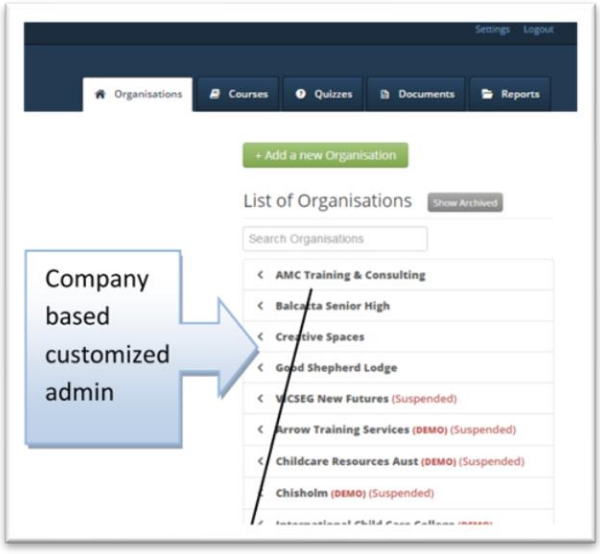
Customized Course and Quiz and E-Learning

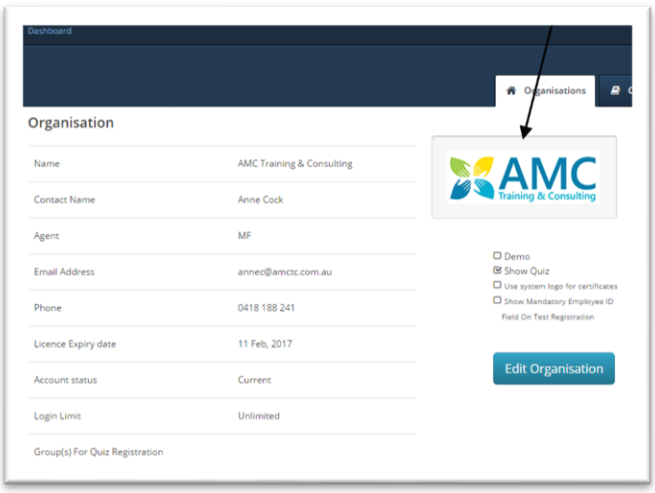
Client: LearnPlus Organization (Australia)

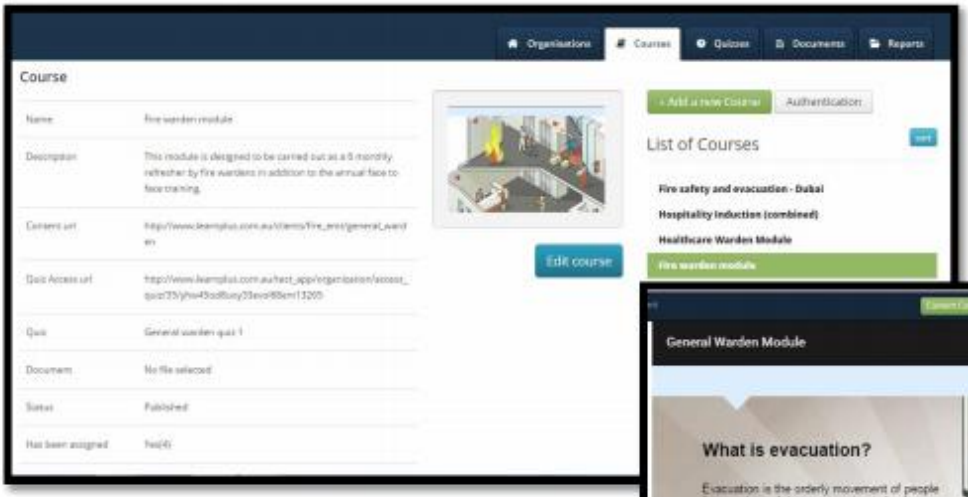
Detail: An Application that manages, analyze and generate reports of learning materials and exams. Interested group can assign as user after communicating with the host company. They can use the system to learn on specific area. Customized learning system can be generated also.

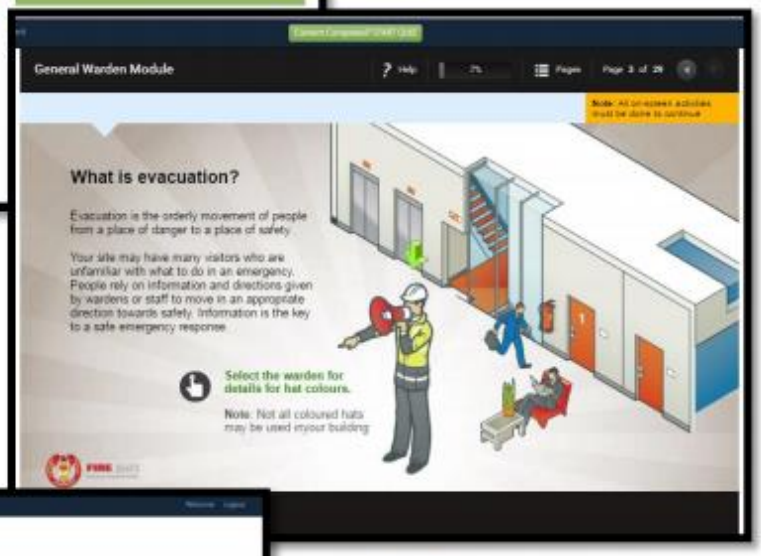
Project Status: Learnplus Organization of Australia is managing their Online Courses & Certifications with numerous registered organizations and individuals using this system.

At a Glance: Admin system creation for different organizations:

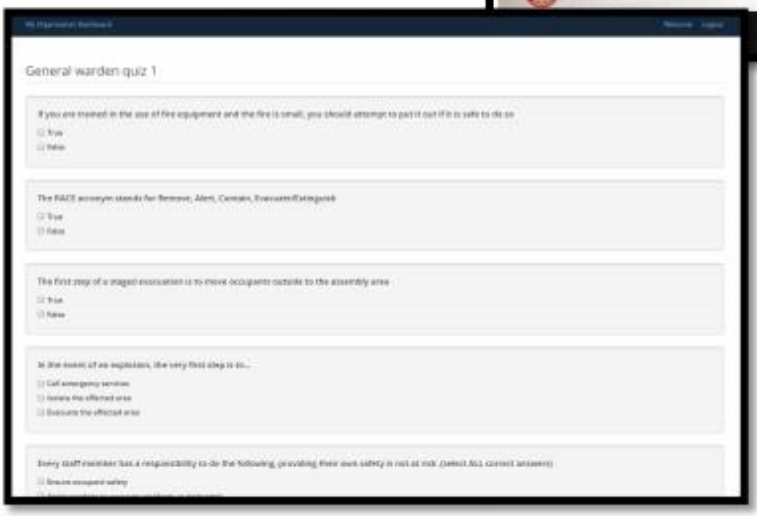


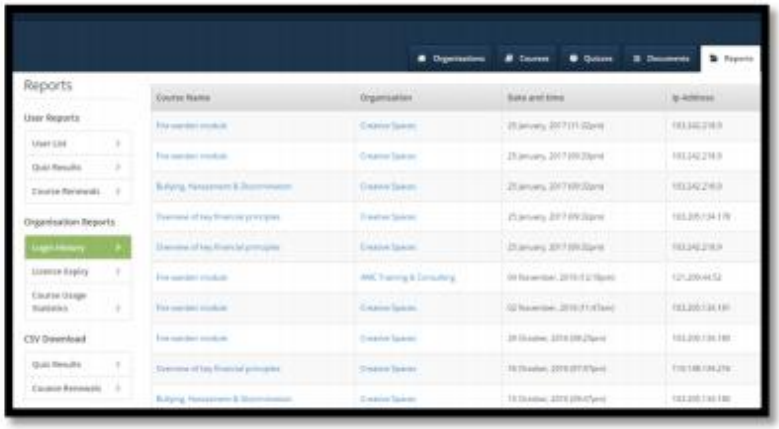






Set Up a Course> Learn Online> Attend Exam> Check Report(Admin)





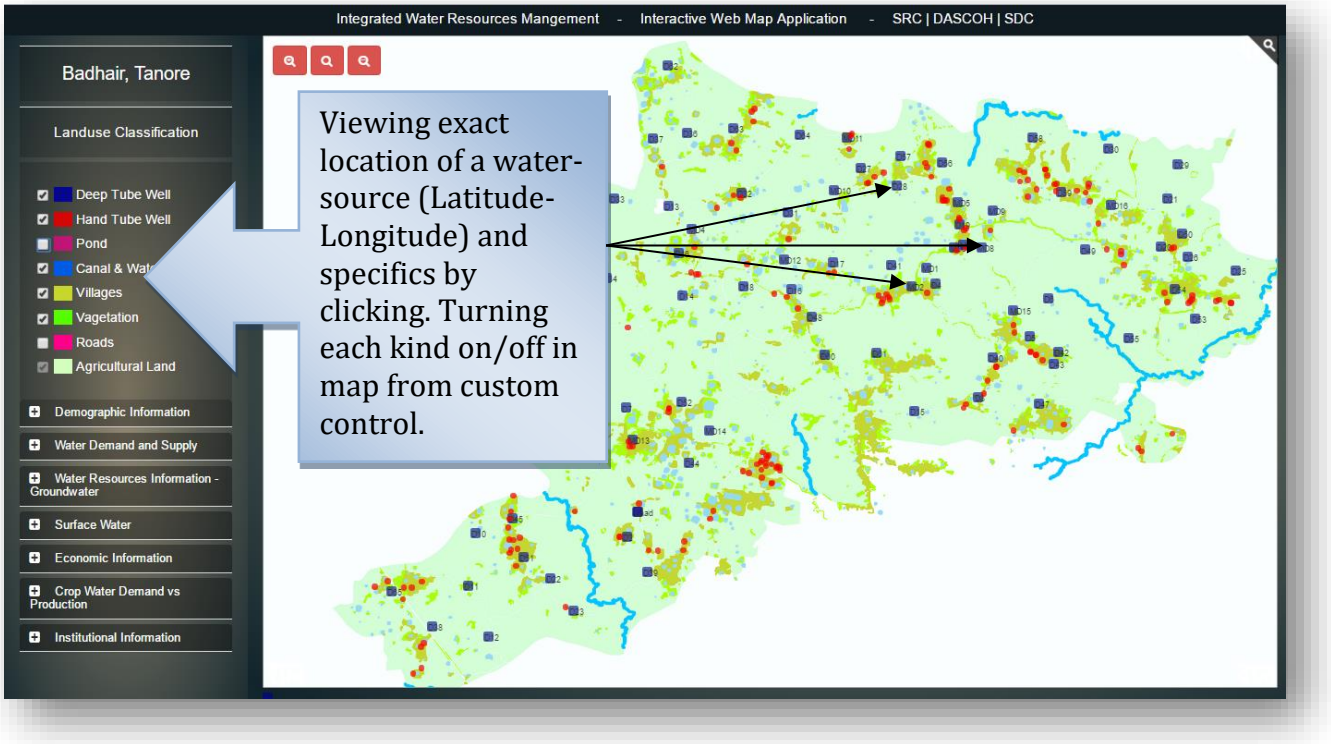
Interactive Web Map for Water Resource Management

Web based Water Resource Mapping System

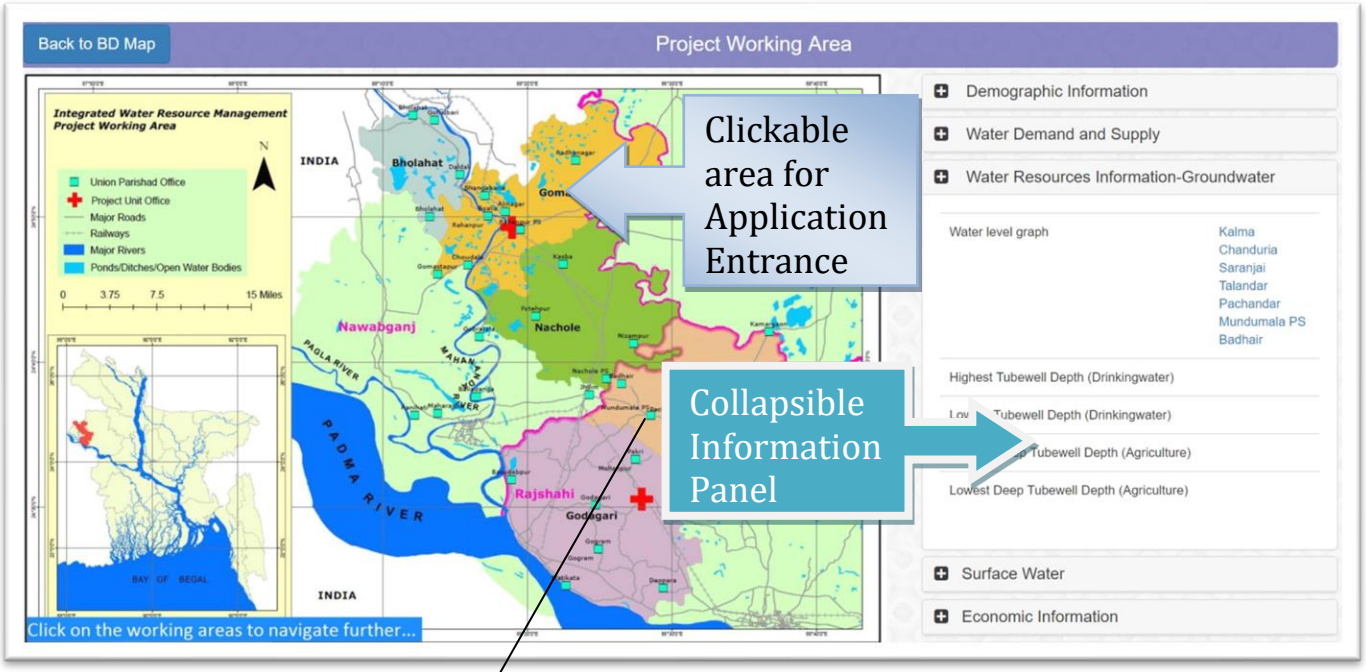
Clients: DASCO (Funded by Swiss Red Cross)

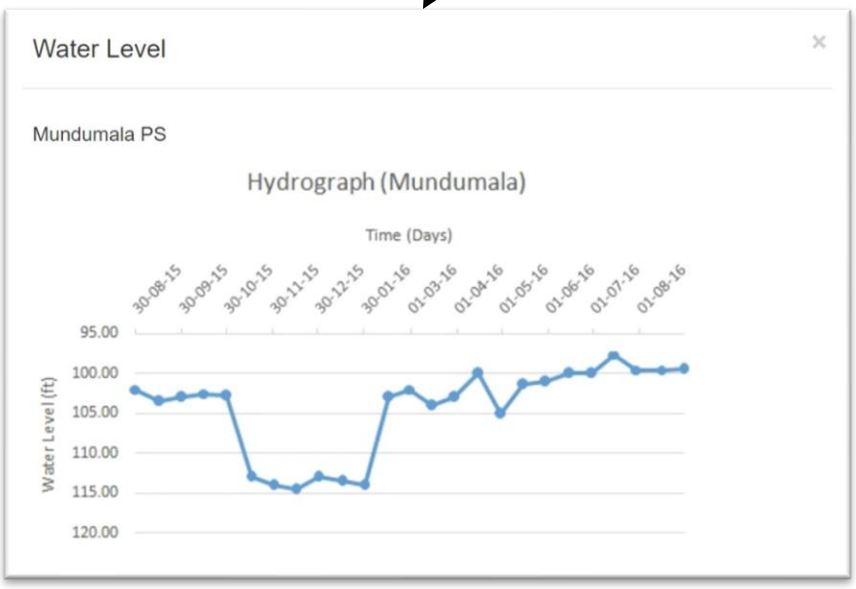
Details: Interactive Intervention Mapping for Integrated Water Resource Management. A customized Web Application for entry of location-wise intervention points with adjacent information on the map of Unions in Different Upazila of Rajshahi District.

At a Glance:



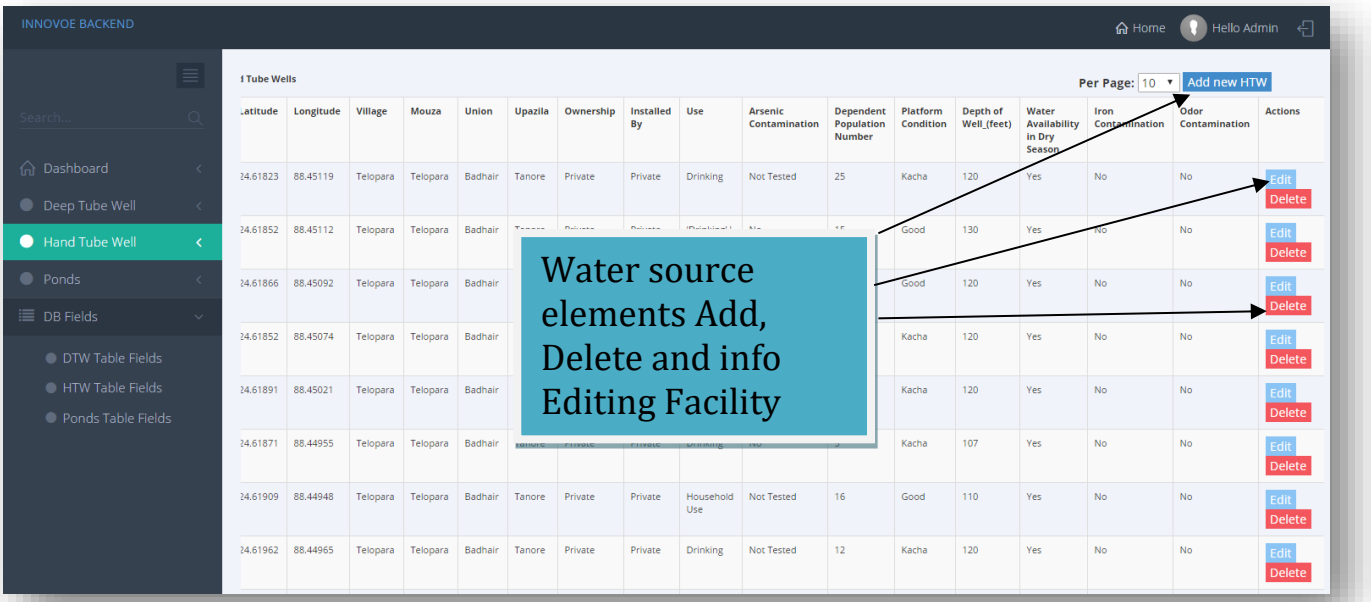
Project Area and other Maps with clickable area portions, demographic and other editable information panels:



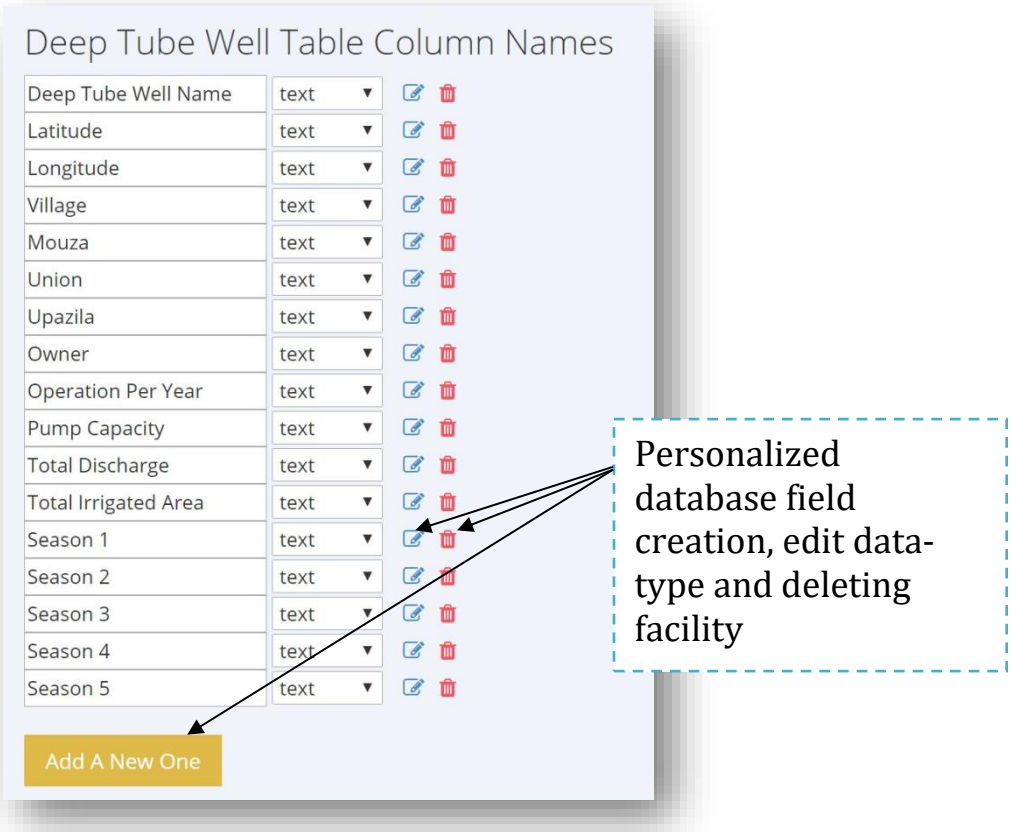


Water Level Graph for Specific Area Points

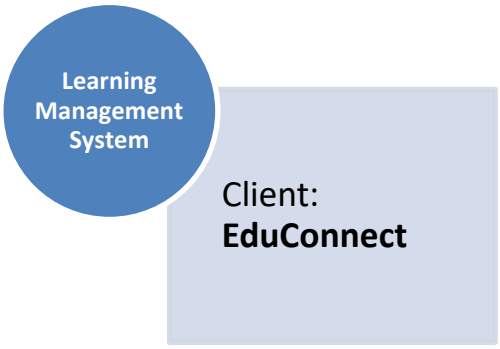
Secure Back-end Application for Managing the intervention (water-source) information database:



Database Customization Facility:



Learning Management System



Detail:

EduConnect's Learning Management System (LMS) is a scalable and flexible platform that caters to both educational institutions and corporate training programs. The system allows educators to create interactive courses, track student progress, and issue certifications upon course completion.

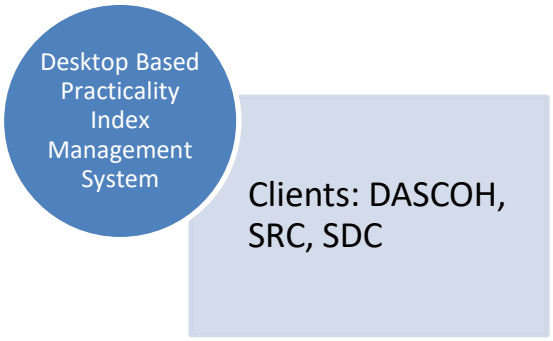
Key Features:

- **Course Creation & Management:** Enables the creation of multimedia-rich course content.
- **Student Enrollment & Progress Tracking:** Real-time monitoring of student activity and performance.
- **Automated Assessments & Certifications:** Automatically grades quizzes and generates certificates.
- **Live Sessions & Discussion Forums:** Supports real-time interaction and collaborative learning.
- **Customizable Branding:** Institutions can personalize the platform with their logo and theme.

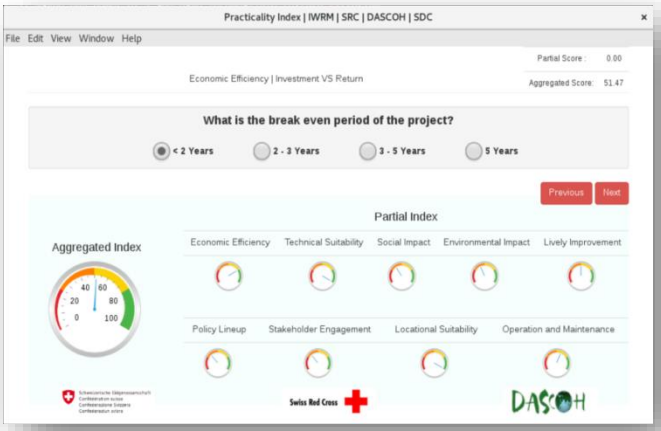
Project Status:

The system is live and widely used by educational institutions and corporate clients. Future updates will include AI-driven course recommendations and adaptive learning paths.

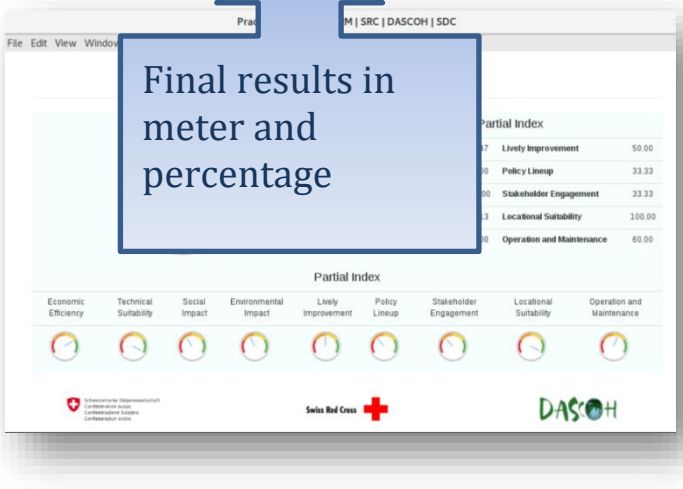
Practicality Index Management System



Detail: On-demand customized desktop based software that shows the statistical impact of projects on different broad criteria. The impacts are measurable in both percentage and dynamic visual meters. By entering particular survey data in the software user can see the effect of the project on the criteria of interest.

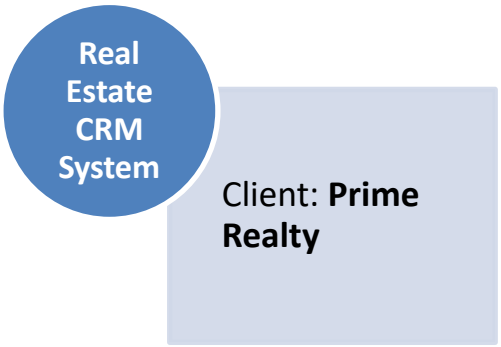


Shows instant impact to different Q/A from the survey in different criteria meter



Final results in meter and percentage

CRM Software



Detail:

A powerful real estate customer relationship management (CRM) system built for Prime Realty, enabling real estate agents to manage leads, track property listings, and streamline their sales processes. The CRM enhances customer engagement by providing real-time access to property details and status updates.

Integrated with popular property listing websites, the system offers advanced search capabilities, matching customers with properties that meet their preferences. Agents can track deal progress and client interactions, ensuring no opportunity is missed. Comprehensive performance reports help agents assess their sales efforts and optimize strategies.

Key Features:

- **Lead Management:** Captures and nurtures leads from multiple channels.
- **Property Management:** Manages property listings with detailed descriptions and multimedia support.
- **Sales Pipeline Tracking:** Visualizes the entire sales process from inquiry to closure.
- **Client Communication Tools:** Integrated email and SMS communication tools.
- **Performance Analytics:** Tracks agent performance and generates actionable insights.

Project Status:

Successfully deployed and actively used by Prime Realty's team. It has streamlined their sales workflow and improved client relationship management.

School/College Education Management System

Total Education Management System

Clients: Cosmo School, Premier School Dhaka, Ghazi Memorial High School

Details: Education Management System featuring student admission, listing, profiling and promoting, yearly fee book generation, financial report and due report, bank data import, admission-tuition slip generation, exam module and settings to customize necessary values.

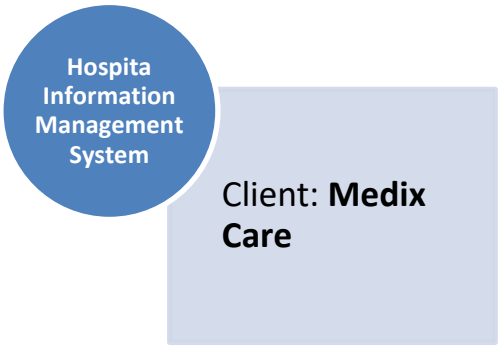
Hospital Information System



Detail:

A state-of-the-art Hospital Information System (HIS) developed for MedixCare to centralize patient records, manage appointments, and integrate laboratory and pharmacy services. This system offers a comprehensive solution for healthcare providers, improving patient care and administrative efficiency.

The electronic medical records (EMR) module ensures accurate and up-to-date patient information is always accessible. The laboratory information system (LIS) tracks diagnostic tests and results, while pharmacy integration ensures seamless prescription management. Advanced reporting tools help hospital administrators monitor performance and optimize resources.

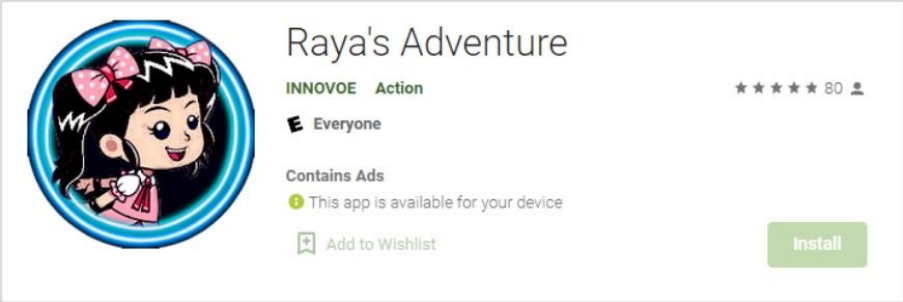
Key Features:

- **Patient Registration & EMR: Maintains** complete medical histories and ensures quick access to patient data.
- **Appointment Scheduling & Billing:** Simplifies appointment booking and automates billing processes.
- **Laboratory Information System (LIS):** Manages lab requests, results, and reporting.
- **Pharmacy Integration:** Tracks drug inventory and prescription fulfillment.
- Advanced Reporting Tools: Offers real-time insights into hospital performance and resource utilization..

Project Status:

The system is live and actively used by MedixCare's staff. Plans are underway to introduce telehealth services, further enhancing the hospital's digital capabilities.

Raya's Adventure (Game)



Google Play store Link:

https://play.google.com/store/apps/details?id=com.innovoe.rayas_adventure&hl=en&gl=US

At a glance: Raya's Adventure is a platformer 2D game with puzzle solving, action and aliens. It's a game full of adventures. The plot is about a little girl named 'Raya' and her puppy 'Bruno'. Bruno gets abducted by aliens. Raya looks for Bruno and the goal is to find each other. You get to play with both characters.
